Remaining Time (Day)

Opens drop down menu with options: Load, Save, Close

Load: User can load existing file

Save: User can save current data into a new file

Close: Closes the program

Opens Drop down menu with options: Edit Goals, Edit Activities
(once one of these are clicked an popup will appear where user can input new values)

Edit Goals: Allows user to edit goals

Edit Activities: Allows user to edit activities on chosen day

Opens Drop Down menu with options: About

About: just shows project info (name, date, authors)

The screenshot shows the 'Habit Tracker' application window. At the top is a title bar with the text 'Habit Tracker'. Below it is a menu bar with three items: 'File', 'Edit', and 'Help'. The main content area is divided into three sections. On the left is a sidebar with a light blue background containing several input fields: 'Goal/Activity', 'Day' (with a note '(only shows When activity is selected)'), 'Sleep', 'Exercise', 'Study', 'Work', and 'Leisure'. At the bottom of this sidebar is a green button labeled 'CONFIRM'. The middle section has a grey background and contains three large white rectangular boxes labeled 'Activities', 'Goals', and 'Special Outputs'. The right section also has a light blue background and contains a vertical stack of seven buttons: 'TotalHoursLogged', 'TotalHoursLoggedDay', 'Max & Min Activity', 'WeeklyGoalsAchieved', 'DailyGoalsAchieved', 'NumberGoalsAchieved', and 'Goals Exceeded (Day)', followed by 'Remaining Time (Day)' at the bottom. Annotations with colored arrows point from text blocks to specific UI elements: a green arrow points from the 'File' menu item to the 'Opens drop down menu...' text; a red arrow points from the 'Edit' menu item to the 'Opens Drop down menu with options: Edit Goals, Edit Activities...' text; and a blue arrow points from the 'Help' menu item to the 'Opens Drop Down menu with options: About...' text.

User can select either Goal Activity

User can select day from dropdown (monday-sunday)

User can input values for each activity and data will be stored in either goal or activity (depending which one the user selected above)
